The 'Luxury Blow Dry'

Nanotherapy products are simply blow-dried into the hair to turn a normal blow-dry into a 'luxury blow-dry'. It's a revolution in treatment application – it's really easy and takes no extra time!

Now, when a client makes an appointment, more and more salons are simply asking, "Is it a normal or a luxury blow-dry?" – this is a great way of increasing revenue for the salon and makes every client feel really special! The client price for any Nanotherapy treatment is from just \$25 on top of your normal blow-dry price. Why not make this a part of your salon procedure? If you ask the question consistently, you'll be consistently successful!

Colourlock protects and seals colour into the hair and helps prevent fade up to **49%**, so colours last longer. Lighter colours will sparkle and darker colours will be more intensive.

NEW New! 3D Shine will give up to six weeks of fabulous shine and silky texture to the hair.

3D Extra Volume will add a volume boost that makes the hair **20%** thicker and lasts about four washes, as well as up to six weeks of lovely shine and texture. Great results on fine hair.

Voila! Beautiful results!
