

NANOMAX - THE BOTOX FOR HAIR

REPAIRING AUSTRALIA

Nanomax treatments are being hailed as world class internationally. With their recent new packaging design, editors all over the world are claiming it's like comparing an iPod to a record player. Picking up fast in Australia with accounts and salons requesting more products everyday, you have to be quick to get your hands on these new innovative treatments.

Offering five different treatment processes, Nanomax is leading the way in hair treatments worldwide. These include the Permanent Repair treatments- Intensive, Repair and Hydrate, along with the Hair Enhancing treatments- 3D Shine and Colourlock.

NANOMAX is a professional, prescriptive range of permanent repair treatments for damaged hair and specialist 'hair enhancing' treatments that ensure beautiful results on all hair types and textures.

Carried to the hair surface by an incredibly fine mist, our treatments use the latest technology to infuse tiny, nourishing nanomolecules deep into the hair structure that heal, repair, strengthen, protect and shine!

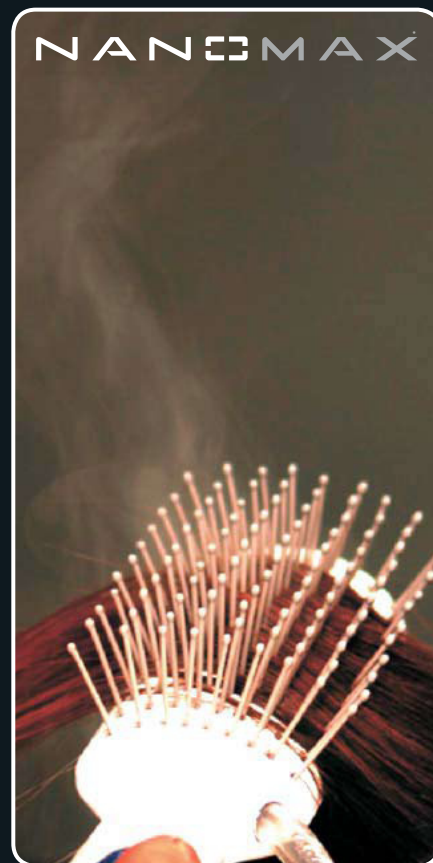

OUR PERMANENT REPAIR TREATMENTS

INTENSIVE, REPAIR and **HYDRATE** have been especially formulated to permanently repair damage caused by chemical processes such as colour, bleaching, highlights, perms and straighteners, as well as the sun, pollution and everyday wear and tear.

NANOMAX treatments can be combined to create a personalised prescription based on your individual hair needs. For the best possible results, we recommend an initial course of 3 treatments. Because your hair grows and damage is continuous, we recommend that the course is followed by regular top-up treatments. This will restore the softness, beauty and shine to your hair, so you can always look your best!

OUR HAIR ENHANCING TREATMENTS

3D SHINE is a quick and easy service that gives up to six weeks of texture and shine! **COLOURLOCK** has been scientifically formulated to prevent fade by up to 49% for longer-lasting and more vibrant colour results with a fantastic shine!

PERMANENT REPAIR TREATMENTS

Suitable for more serious damage caused by colour, bleach and other chemicals, as well as very weak natural hair.

Suitable for heat damaged hair (especially by straighteners), to reverse normal everyday wear and tear, and also for chemically-treated hair in good condition.

Suitable for naturally dry, frizzy or dehydrated hair.

HAIR ENHANCING TREATMENTS

Great shine for all hair types and textures, a deep, intensive shine that smooths and helps prevent frizz. The perfect finish for any style.

For all coloured hair - seals and protects colour with a gorgeous shine, helps prevent fade by up to 49%.
